The BTE Culvert Cleaner System

Improper drainage = poor track structure

Avoid dangerous and costly wash outs

Problem – Blocked culverts result in track and road damage

Solution – BTE Culvert Cleaner System

Results – Clean culverts save millions on track and road repair and down time

The **BTE Culvert Cleaner System** includes the BTE-312 Hi-Rail with the BTE Culvert Cleaner attachment, the BTE-420 Hi-Rail, and the BTE Cart.

BTE Culvert Cleaner System Benefits

- Clean culverts eliminate washed out track and resulting track maintenance and train delays due to water damage from plugged drainage culverts.
- BTE Culvert Cleaner eliminates the need for removing debris by hand inside culverts, keeping workers safe and productive.

The BTE Culvert Cleaner System

BTE Culvert Cleaner Features

- BTE Culvert Cleaner Hi-Rail System allows track access to problem culverts in remote locations
- Small Hi-Rail gang of two machines and one supply cart
- Quickly climb off track to clean culverts, freeing up valuable track time
- Remove rock, dirt, and muck from round or boxed culverts from 12 inches to 8+ feet in diameter
- Tackle up to 140-foot-long culverts by adding additional auger sections
- Quick and efficient work allows cleaning of multiple long culverts in one day
- Mechanical cleaning with high torque drive system, so cleaning does not require any water
- User friendly system only requires two operators and one person on the ground
- Precision operator control with multiple cameras allows viewing progress inside the culvert
- BTE cart is designed to hold augers, racks, tools, and buckets
- Available on Hi-Rail, track, or rubber-tired equipment

Hi-Rail to culvert area

Easily adapt to culvert lengths by adding more flights

Auger held on both ends

Work is done off-track
